MEASUREMENT GUIDE

It is important to measure your body accurately for garments to fit correctly. Measure over light clothing or underwear. Make no extra allowance for movement ease, we do that for you when designing our products.

- 2. WAIST**  
Measure around the natural waistline.
- 3. LEG LENGTH**

MEN

Measure around the base of neck and make sure the tape fits comfortably.
- 2. CHEST**

- 3. WAIST**  
Measure around the natural waistline.
- 4. LEG LENGTH**

GARMENT CARE

We take great care to use quality fabrics for all our ranges. Garment and fabrics are tested under carefully monitored conditions in accordance with recognised standards. Wash tests check for colour fastness, shrink resistance and care label accuracy. Wear test are undertaken to check the serviceability and longevity of garments.

- LAUNDERING**  
Always refer to the care label before laundering and ensure the care label instructions are adhered to. Always wash dark colours separately. Fabric softeners and conditioners may prove detrimental to the performance of some garments.
- GARMENT SHRINKAGE**  
Excessive shrinkage is primarily due to factors such as heat and major agitation during the wash cycle. Always wash as per the instruction as stated on the care label.
- PILLING & BOBBLING**  
Abrasion and timely washing of garment with fabric softeners leads to fibre balls appearing on the surface of the fabric. Remove balls by mild surface brushing. We strongly recommend not to use fabric conditioners in the wash.
- TRIMS AND ACCESSORIES**  
Trims and accessories like zips, toggles, pocket linings and elastic cords are constructed for normal use.
- COLOUR STAINING**  
Wash similar colour garments together. Do not leave damp garments together for any length of time.
